

Main Street The World of Wheat

Hey! Cowboy yodelers, you had better start practicing now for the contest dance, that is being planned for some time in the near future.

The Searle Grain Co. are having their house here re-decorated before Mr. and Mrs. Cole move in. Mr. Cole succeeds Mr. Cole as grain buyer for this company at Irma.

Miss Clara Eager has returned to her position in the Wainwright hospital after two weeks vacation spent with her folks in the Crescent Hill district, also her brother and family at Entwistle, Alta.

Miss June Frielkelton and Miss Joyce Foxwell were two lucky winners at the Wainwright sports, taking first in the parade for imperfection. They were dressed as two blue birds and hopped into first place. Congratulations, girls.

Mrs. Geo. Rubenok tells us that Pearl's old cat which died last week of old age was 18 years and one month old. Henry, as he was called, was got from Mr. Allen in the spring of 1920 for Pearl who was then a very young child. This is a ripe old age for a house cat.

The Irma L. O. L. are planning another sports day on August 10. The different events planned for July 1st were not pulled off owing to the fact that the ball teams and other sports fans were attending celebrations in Wainwright, Mannville and other places.

The regular monthly meeting of the Alma Mater and Roseberry Ladies' Aid on Thursday, July 21, at the home of Mrs. W. Milton, Mrs. O. Eger will have charge of devotional and hostesses are Mrs. C. Steel and Mrs. Anderson. Neighbors and friends are cordially invited.

The Irma United Sunday school picnic held at Mott Lake on June 29 proved to be a very successful affair. The executive wish to thank all those who took care, also those who were so kind in loaning or taking cars to convey the people. At the last a few stray things were picked up at the pavilion and taken to the church basement where you can get them.

By H. G. L. Strange, Director,
"Crop Testing Plan"

The Canadian Seed Growers' Association met towards the end of June for what was in effect its 35th Annual Convention.

Thousands of farmers no doubt will have read this announcement in the press, and will think perhaps it is of little or no concern of theirs.

The fact is, however, that if thirty eight years ago the late Dr. James W. Robertson, the late Sir William C. MacDonald and Mr. George H. Clark, who until recently was Seed Commissioner of Canada, had not had a remarkable vision about seed selection, it is quite probable that Canadian wheat would have the reputation it enjoys today on World's markets, that consequently much less wheat each year would have been exported, therefore much less produced, hence that the population of Western Canada would be much smaller than it is.

Members of the Canadian Seed Growers' Association, for thirty eight years, have maintained in a pure state such important varieties as Red Fife and Marquis wheats, and have made large quantities of pure seed of these varieties available to farmers at reasonable prices.

The Canadian Seed Growers' Association, I suggest, deserves well of every farmer, and of all those who depend upon farmers for a living, in Western Canada, for it has made, through the efforts of its members, truly important contributions towards the advancement of Canadian

Viking News-Items

Induction services for Rev. Mr. H. G. Lester to the pastorate of the Viking United church were held Monday evening. Present to introduce the new pastor and address the congregation on their duties were Rev. Mr. Longmire, of Irma, and Rev. Mr. Griffith, of Jarroir, representatives of the Wainwright presbytery.

PHILLIPS NEWS ITEMS

A postponed party was held at the school on Thursday. A program was given by the pupils and a delightful lunch served.

Mr. and Mrs. Pisci and C. L. Bjorkman took in the Wainwright sports and reported that Wainwright is to be congratulated on their splendid sports.

Wheat is heading out and some good heights are reported. Some show the effects of the heat and dry weather.

Mr. H. L. Cooper spent the weekend in the city.

Emma Harry is home again after taking high school at Viking.

NORSE PICNIC AT McLAUGHLIN

A Norse picnic sponsored by the McLaughlin Norden Choir was held in McLaughlin on July 1st. A warm clear day attracted crowds from far and near to enjoy a varied program.

Norwegian and English songs were rendered by the choir under the direction of Mr. Anders Walberg Sr. A troupe of 12 girls trained by Mrs. Hang gave a fine exhibition of Norwegian folk dancing in national costume. A demonstration of gymnastics on bars and rings was given by Messrs. H. Hang, G. Thoresen, T. Thoresen, R. Hand and J. Berg with Mr. T. Hang in command. Races for adults and children followed by a baseball game between Roca and Unville Nif-4's, and a softball game between Park Valley and McLaughlin girls brought the day's events to a close.

In the evening old and young stayed to take part in the big dance at the community hall.

"The whole conception of democracy and democratic processes in Canada is built up on the assumption that there is such a thing as public opinion and that public opinion is not only informed but also intelligent."—Dr. W. P. Percival.

"Of all forms of Government meddling, the one that I resent most is Government meddling with literature and the arts."—Channing Pollock.

UNITED CHURCH NOTES

Rev. E. Longmire, Minister
Sunday, July 10th
Albert—Sunday school, 11 a.m.
Public Worship, 11:30 a.m.
Alma Mater—Public worship 8 p.m.
Irma Sunday School, 11 a.m.
Public Worship, 8 p.m.
Mid-week prayer and fellowship service, Wednesday evening, at 8.
A hearty welcome to all.

Women's Institute

The monthly meeting of the Irma W. I. will be held on Friday, July 15, at 2:30 p.m., at the home of Mrs. H. Peterson. This is our annual grandmother's day and a hearty invitation is extended to all grandmothers to join us at this meeting. We assure you a very happy afternoon. Roll call will be answered by "What famous person you would like to be and why." Hostesses: Mesdames H. Peterson, W. Stewart, R. Larson.

TURNER VALLEY FIELD STILL IN RED DESPITE ITS BIG PRODUCTION

Although the Turner Valley oil field produced \$5,000,000 in crude oil last year, and in previous years has produced millions in gasoline and naphtha, more money has been put into it than has ever been taken out. The fact that it may be years before the field as a whole is out of the red.

Just now Turner Valley is the object of great interest but many of the stories about it belong to the "liquid gold" myths relating to oil. These kind of myths continue through the years to be regarded as realities despite all evidence to the contrary.

News of a new well comes out with stories that it has a daily flow of 1,000 barrels or more of oil, and people exclaim: "It must be nice to strike easy money like that". They forget that to get the well the producer had to spend \$150,000 to \$200,000 or more.

This condition does not just apply to the Turner Valley field alone. It is true of most important fields in North America. A statistician has computed that since Drake drilled his first oil well in Pennsylvania in 1860, the average cost of finding and recovering a barrel of oil has been \$1.41, although the average return to the producer has been only \$1.21. It is true that those who combine good luck and good judgement may make a fortune in oil. But the truth also is the oil business as a whole is operating at a loss.

The Industrial East

Spends over \$40,000,000

with the Western Farmer each year

Any fellow who consumes over \$40,000,000 worth of Western goods is worth knowing. And when you know him, you'll find he's a pretty good fellow — a worker and a family man like yourself, who likes to keep busy.

Your purchase of a Canadian-built car helps keep him busy and on a payroll. For Eastern automobile plants alone employ over 18,000 workers and in turn, spread employment — and purchasing power — over many other industries, including textiles, paints, glass, chemicals and steel.

Sure, it's a good thing to know that the Eastern industrial worker is busy and happy and in a position to maintain and augment his purchases which in 1936 alone included over 80,000 tons of fresh dressed meats, 175,705 head of cattle, 21,144 calves and 41,557 hogs to say nothing of 10,000 tons of butter and poultry, eggs, honey, grain products and other commodities to the value of more than \$15,000,000.

For statistical and further information about this industry, write to
Automotive Industries, 1006 Lumsden Building, Toronto.

The Curse Of Education

"The best things in life are not given a percentage."

The foregoing is just a small extract from a speech made to a class of graduating Normal School students by Dr. J. S. Thomson, president of the University of Saskatchewan, to give point to a protest which he uttered against the school system of examinations as it exists in Canada and which he appropriately described as "a curse."

It is indeed gratifying to find leaders of education in the Western provinces voicing such a viewpoint on an inelastic method of categorizing school students—pigeon-holing them under valuations elicited as a result of the application of a rule-of-thumb system of examinations.

As Dr. Thomson said: The grading of A's, B's and C's, and this multiplication of credits until students don't know where they are, "leaves so little place for all the noble things in life that can never be put in terms of percentage."

While the press report of Dr. Thomson's address did not enumerate those noble things towards which the student mind should be guided, it is not difficult to enumerate them and they can all be incorporated in the single-term "good citizenship," provided the definition of that phrase is made to include all that it should designate.

Good Citizenship

And good citizenship means much more than interest in government, in community affairs, in neighborhood welfare and the like. It involves the development of good sportsmanship, unselfish interest in the welfare of others and the will to recognize and place human values above material considerations and the advancement of moral and spiritual welfare.

It is because these things are, and should be, the ultimate goal of the educational system that the personality and character of the teacher should be the ranking qualification; for, as the teacher is, and not as the teacher says, so will the pupil be during the formative years of the child's career. The teacher is destined to implant an unconscious and ineradicable mark on the mind of the impressionable youth under his or her care.

The value of the teacher to the children, to the community and the nation should be measured in terms of character and integrity rather than in brilliance of erudition. A teacher of strong individuality and mediocre academic attainments is worth immeasurably more to the future generation than one who is superlatively clever but lacks the attributes which inspire respect and admiration. The teacher who combines both is a jewel indeed and for such, adequate compensation cannot be measured in dollars and cents.

In the tuition of those things which as Dr. Thomson says, cannot be registered in percentages, an ounce of practice is worth a ton of precept, to paraphrase a time-honored saying. The teacher who renders only lip service to the noble things of life is not worth his or her attributes which inspire respect and admiration. The teacher who is a living example of the aspirations which he or she holds up to the pupils as the lodestar of their careers is a pearl of great price.

While the teacher may have to conform, through regulatory control, to the examination system in greater or less degree, he or she will perform his or her greatest and most valuable work when moulding children into future citizens with ambitions to reach for the highest and best that life can give, not in material terms, but in the moral and spiritual realms, and this can only be done by the influence of example.

A Permanent Influence

The teacher who plays the game of life on the basis of the highest rules will exert an unconscious influence for good on his or her charges that will never be extinguished throughout life, and fortunate, indeed, is the child whose future destiny is placed in such competent and reliable hands.

Nor will that impelling force die with the passing of the teachers' charges. It will be passed on from generation to generation. Like the ripple made in the water by the cast stone or the impulse surging through the ether from a radio transmitter, no one may say how far it will go or measure the extent of its ultimate effect.

The teachers about to embark on their difficult and highly responsible task of laying the foundation for a new and better nationhood were urged by Dr. Thomson to set before themselves three standards, or, as he called them, "attitudes of life": the absolute worth of the individual human being, the building of character and the value of citizenship, and pointed out the importance of selflessness with the appropriate comment that "the way to be unhappy is to fall in love with yourself."

Excellent advice which, if it falls on receptive ground, is bound to yield rich dividends to the country in the future.

Yields Another Treasure

Paris Wrecking Crews Find More Gold Coins In House

The old house at 53 Rue Moutetard, Paris, where wrecking crews found a \$90,000 treasure in gold Louis, has yielded another and richer hidden hoard.

Workmen broke down a new section of wall and brought to light a leather and cloth bag packed with ancient gold pieces. Although an estimate of the worth of the new find was not immediately available, officials said it was greater than \$90,000.

The currency found first had been willed by Louis Nivelle, King Louis's equerry, to his niece, Anne Louise Claude Nivelle, according to the testamentary document found then.

Hotel Guest: "Is there an Encyclopedia Britannica in the hotel?" Clerk (with polite attention and regret): "There is not, sir; but what is it you wish to know?"

Brain Waves

Specialists Find That Electric Current Flows From The Brain

New light on the human brain, in the form of long, low-voltage waves of direct electric current flowing from grey matter was discussed by the American Psychiatric Association at San Francisco.

This direct current is positive during consciousness, negative in unconsciousness and apparently the forerunner of death when it lasts too long.

Its discovery amazed the brain specialists for two reasons. The brain gives off the direct current simultaneously with alternating current. One wave of the direct current lasts 10 to 30 minutes while the "A.C." pulsates at an average of 19 a second.

Aversion to using their hands for carrying anything is so strong among the native women of Paramaribo, Dutch Guiana, that they even put letters on their heads, weighing them down with a brick.

A baker has written his will on a biscuit. It is to be hoped that after the lawyers have had their nibble there will be a few crumbs left for the legates.

Not Good Publicity

Successes In Canada Not Stressed As Much As Failures

"Canada," said Lord Tweedsmuir to the visiting Scottish farmers the other day, "gets rotten publicity: too much for the failures and too little for the successes." There is much truth in that remark, states the Ottawa Journal.

The world hears about our Western drought, the problem of our railroads, but much less about our solid accomplishments. Perhaps the world does not realize that this small population in half a century has made a nation out of scattered settlements, has made a good start in the development of rich natural resources, is one of the foremost trading countries on earth. Sometimes in the face of immediate difficulties we fail to hear these facts in mind even among ourselves.

The trouble is that our accomplishments go into the blue books, but our difficulties are news, and our successes are not sufficiently understood abroad. Perhaps it isn't news, but it is a fact of first importance that alongside an English-speaking nation of 130 millions we have preserved and developed a British country, solidly devoted to the British tradition. The progress of agriculture, of industry, of mining may not be news, as drought is news, but that progress has been a vital factor in world history of the past half century.

There isn't much we can do in the matter, of course. We shall just have to carry on in the knowledge that even in the United States many people still believe Canada a place of perpetual ice and snow inhabited mainly by Eskimo and Mounted Police, but we need have no inferiority complex on that account.

Prime Ministers

Sixteen Ministries And Eleven Premiers In Canada Since Confederation

During the 71 years since Confederation there have been 16 Ministries and there have been 11 Prime Ministers in Canada. In the 34 years, up to 1901, there were seven Prime Ministers and in the 37 since then only four have been added to the list says "Canada's Weekly."

Most frequent changes in Premiership came after the death of Sir John A. Macdonald in 1891. Between that year and 1896 there were five new Prime Ministers—Sir John Abbott, Sir John Thompson, Sir Maclean, Sir Charles Tupper and Sir Wilfrid Laurier.

Sir John Macdonald was leader of the government for about 19 years, the longest period, but Sir Wilfrid Laurier, leader for 15 years, had the longest unbroken term. Sir Charles Tupper had the shortest term, only two months and one week. Sir Robert Borden was office for eight years and 10 months. Mr. Mackenzie King, the present head of the government, has been Prime Minister for about 11 years.

All Mr. Meighen's predecessors, except Alexander Mackenzie, were given titles. Sir Charles Tupper received a baronetcy. The widow of Sir John Macdonald was created a baroness. Messrs. Arthur Meighen, W. L. Mackenzie King and R. B. Bennett have remained untitled.

Checking Aliens

Scotland Yard Searching For Aliens Residing In United Kingdom

The special branch of Scotland Yard, co-operating with the Home Office, has launched a thorough check of alien residing in the United Kingdom, who are estimated to number around 200,000.

Officers are questioning an average of 50 a day and have found many for whom they were searching came to the country last year for the Coronation, renewed their visas last November and have neglected to renew them again.

Immigration officials also are keeping a close watch for aliens entering at British ports.

Two of the eggs were bad, and the lady had taken them back to the shop. "That's all right, mum," said the grocer's boy, "You didn't need to bring them back. Your word is just as good as the eggs."

Refugees From Austria

Seeking Countries That Promise Toleration And Freedom

With refugees pouring out of Germany and particularly from Austria, the League of Nations refugee office in London is redoubling its efforts to gain entry for them into countries whose institutions promise toleration and freedom.

Australia has just signed an agreement accepting 500 annually and the Canadian government soon will be approached to make at least an equal contribution towards a solution of this problem.

Most of the refugees are Jews, although 20 per cent. are Christian Jews. The German Jewish aid committee, on behalf of the Orthodox Jews, has raised a large fund guaranteeing the Australian government that none of the settlers will become public charges for five years. A similar guarantee will be given the Canadian government, it was learned, if the immigration regulations will be relaxed to the extent of permitting entry for 500 annually. The British government is accepting thousands of refugees without guarantee.

Oxford has awarded two of them major chairs and other universities are eagerly seeking the services of outstanding scholars and scientists among the refugees.

SELECTED RECIPES

LIGHTNING LAYER CAKE (Two Eggs)

- 3 cups sifted Swans Down Cake Flour
- 3 tablespoons Calumet Baking Powder
- 1 teaspoon salt
- 1½ cups sugar
- ½ cup softened butter or other shortening
- 2 eggs, well beaten
- 1 cup milk
- 1 teaspoon vanilla

Sift flour once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine eggs, milk, and vanilla, and add to flour mixture, stirring until all flour is dampened. Then beat vigorously on minutes. Beat in two cups of 9-inch layer pans in moderate oven (375 degrees F.) 25 minutes. Spread Soft Mocha Frosting between layer and on top of cake.

Soft Mocha Frosting

- 4 tablespoons butter
 - 4½ tablespoons strong coffee
 - 3 cups sifted confectioners' sugar
 - Dash of salt
 - 1 teaspoon vanilla
- Add butter to coffee and heat just to boiling. At once pour over sugar, stirring until sugar is dissolved. Add salt and vanilla. Beat until smooth and of right consistency to spread. Makes enough frosting to cover tops of two 9-inch layers, or top and sides of 8 x 8 x 2-inch cake.

Made To Order

Research Engineer Explains How Synthetic Moonlight Is Produced

Synthetic moonlight which can be produced in the parlor by the flick of a switch appeared as a great boon for love making.

Aubrey E. Noble of Buffalo, research engineer in gas tube lighting, explained it's all done with gas tube lighting. Silvery-blue rays of moonlight are produced by switching off all the colors except blue in synthetic daylight.

Synthetic daylight has been used with success by florists in New York. For housewives who like color in their home the engineers have worked out a plan which combines the use of a mercury lamp with fluorescent crystal paint. The walls are painted with fluorescent crystals and rays from the invisible lamp give a brilliant colored effect.

To Avoid Collisions

Civil aircraft operators have been warned against jockeying over London at night, or in fact flying within 20 miles of Westminster bridge between sunset and 2 a.m. at altitudes between 3,000 and 11,000 feet to avoid collisions during manoeuvres.

A new ordinance map of the county of Surrey, England, with a scale of 25 inches to the mile, shows every building more than 10 feet square.

Must Serve Seven Years

Before R.C.M.P. Constables Are Given Permission To Marry

Reports from western Canada that some Royal Canadian Mounted Police constables are resigning because of new marriage regulations could not be confirmed at Ottawa, although officers of the force said it is possible some are leaving for that reason.

After Col. S. T. Wood took command of the force last winter he increased from five to seven years the time a constable must serve before he is given permission to marry. In the early days of the force a man had to serve 12 years before he could marry and this was gradually reduced. Sir James MacBrien, who preceded Col. Wood, reduced it from seven to five years.

The increase back to seven years was made because it was considered the proportion of married men among the constables was too large and affected mobility of the force. It also increased expenses. When a constable is transferred there is the expense of moving his family. Married men also draw double rations and are allowed additional pay to cover separate living quarters.

Constables who have been four years in the force when the seven-year regulation came into effect will be granted permission to marry when their five years are up, but those who have only one or two years' service will have to wait until they have been in the force seven years.

Advice From Earl Baldwin

Sees Danger In Britain From Mechanized Reading And Thought

Mechanized amusement, mechanized reading and mechanized thought, says Earl Baldwin, constitute a danger in Great Britain to-day.

The former prime minister, opening a community hall at Wilton, England, declared: "Our England has always been a country of individuals, of individual thought, of individual work, of individual mind, and I pray God it may always be so."

Modern transport had increased the influence of the town on the country. The same films were seen, the same newspapers read, in town and country.

"The danger of that," contended Lord Baldwin, "is getting a kind of standardized, suburban, mechanized mind, and it is, in our view as Englishmen, the improper use of these media that in many countries has enforced upon the people a regimentation of thought which we believe is a great danger for the future."

Hoping the community hall would be a means of recreation and enlightenment, he warned: "Be yourselves of the old English countryside. Be your own performers for your own amusement. Be yourselves, think your own thoughts, act as you will; be individual, be independent."

Her Mistake

An Orchard street resident of Brockville, Ont., politely declined the offer when a small boy and girl knocked at her door offering tulips for sale. She said she had tulips of her own in the garden. But she had not. When she went into the garden a few minutes later she found they were gone.

Alphabets of different languages contain the following number of letters: English, 26; French, 23; Italian, 20; Spanish, 27; Russian, 41; Latin, 22; Greek, 24; Arabic, 28; Persian, 32; Turkish, 33.

The Monarch butterfly takes migratory journeys, and is said to be capable of a 2,000-mile flight.

No matter how low a man may fall, he can still find a dog and a woman to love him—and usually does.

Big Peace Parade

The Hague Saw 10,000 Women March In Silent Demonstration

More than 10,000 Netherlands women from all over the country marched in a peace procession through The Hague, while deputations were received by the Netherlands Government, the municipality of The Hague, and the World Court in the Peace Palace.

This fifth women's peace procession, marching in silence, was a moving expression of women's desire for peace and their general abhorrence of war and violence. It was a reply of Netherlands women to the call issued recently by the Central Committee of the Women's Peace Procession in the Netherlands, addressed to all "women, wives and mothers."

"Let us all," the call said, "on Goodwill Day, give in public a silent testimony of our unweakened longing for peace. Join the ranks of those who know that they are moved by sympathy with the numberless innocent people who in the past year, in Europe as well as in other parts of the world, fell victims to the force of arms."

Similar women's peace demonstrations were also held in Switzerland, France and Scotland.

Sealed Against Moisture

Lotion Applied To Skin Of New Jersey Sweet Potatoes

Sweet potatoes grown near Swedesboro, New Jersey, are being used in some of the nation's larger hotels because of a "beauty treatment" they are subjected to before leaving the local shipping centre. After each potato is washed and thoroughly dried, a lotion is applied to the skin to seal the sweet against moisture. The lotion attains a bright lustre after its application and enhances the potato's attractiveness.

One Honest Firm

The professor had called at nine shops in town for his lost walking-stick and had found it in the tenth.

"Thank you so much indeed," he beamed, as he took possession of it. "Do you know, this must be one of the few honest places in town? I've called at nine shops already and in each I was told that they hadn't got it."

Farmers in California are being taught by agricultural extension workers how to make simple air cooling equipment for their homes.

In Sequoia national park, a chipmunk was declared "champion nut-gatherer" after it had stored 98 nuts in its cheeks at one time.

WHAT HO!

—By—
RICHARD CONNELL

By Arrangement With Thomas Allen, Publisher, Toronto.

CHAPTER XIII.

Fate, in the form of a bus, made up Ernest Bingley's mind for him. It stopped in front of him and he swung aboard it. Whither it was bound he knew not. One of the compensations of poverty is that adventure is not the exclusive prerogative of the rich.

"Where to, sir?" asked the guard.

"I'm going wherever you're going," answered Ernest. The guard gave him an alarmed look, and a tenpenny ticket, and settled away.

At the end of the run Ernest got off. Confronting him was a massive structure, which, a hobo informed him, was the Bank of England. Ernest was wistfully inspecting the exterior of this monument to Mammon, when Sir Peter Tyler, a most substantial and resplendent figure, issued forth.

"Bingley, by Jove," he exclaimed, "What a bit of luck. Glad to see you."

"How do you do, Sir Peter," said Ernest.

"Splendidly, thanks. I rather thought you'd be in town to-day."

"You did?" said a surprised Ernest.

"One finds bees where honey is," said Sir Peter, and winked. "Shall we go in my car or yours?"

"Yours," said Ernest.

A free ride was a free ride, and Sir Peter was Sir Peter.

They entered a limousine like a fancy hearse.

"Club, Willetts," ordered the financier.

They were ferried through the Strand's traffic and delivered at the door of a marble temple in Pall Mall. Sir Peter talked of his golf game, en route. Ernest lolled on the cushions and listened though he did not know a brassie from a birdie.

In the impressive lobby of the club a door-man rigged out in the dress uniform of a field marshal in Albanian dragons, said:

"They are waiting for you in the private dining room on the third floor, Sir Peter."

"Good," said Sir Peter. Then, to Ernest, as they rose in the lift, "Go but our friend cannot be with us. Passport trouble, I believe."

This was so much pure Erse to Ernest.

But he had no chance to ask questions because things began to happen, and happen fast.

Sir Peter steered him into a room where three men were smoking and drinking coffee as if they were holding a wake over the remains of a luncheon. They were men in their middle years, well-turned-out, important looking men.

They greeted Sir Peter as if he were an old acquaintance.

"Permit me to introduce Mr. Ernest Bingley, from America," said Sir Peter. "You've heard me speak of him, I think. Mr. Bingley, this is Dr. Hendrik Van Tromp—the Dutch group, you know."

Dr. Van Tromp, who looked like a Dutch group, having a figure like a

pile of bolsters, made a quasi-military salute.

"Mr. Miles Silver,"

"Mr. Silver, who looked as if he should have been called Mr. Leather for he was banded as a saddle, and looked as tough as a check-rein, said he was honored."

"And Sir Mark Newsome."

Sir Mark, whose spike of ebony beard and anthracite eyes suggested a hypnotist, said:

"Most awfully glad to meet you at last, Mr. Bingley."

Ernest made suitable civil sounds, and waited.

The four men, he was aware, were scrutinizing him closely. The thought struck Ernest that this might be a commission of alienists assigned to ascertain if his being at large constituted a threat to the peace of the kingdom. He crossed his legs and made ready to have his knee-jerks tested.

Sir Peter addressed the meeting.

"Gentlemen," he said, "I suggest we cut this short. I've a pressing engagement, and what I tell you that it involves a nubile and a cadette, you will see why we should waste no time."

"Also, I have a golf game," said Dr. Van Tromp.

"And I," said Miles Silver.

"Booked to fly to Biarritz this afternoon myself," said Sir Mark Newsome.

"Let's get down to it, then," said Sir Peter.

Ernest thought it rather cool of them to turn him through the hopper in a hurry so they could get away to play; but he said nothing, and decided to adopt a policy of silence and thus avoid any verbal traps they might set for him.

"We all know what we are here for," said Sir Peter.

"And we have a pretty good idea of what Mr. Bingley is here for," said Mr. Silver, and his smile, somehow, made Ernest think of a tom-cat he had once caught raiding the canary department of his pet-shop.

Ernest sat back wearing the sage and solemn look of a mortician. A nugget of wisdom from his reading came back to him—that dictum of some early statesman—"When in doubt, keep your mouth shut and your eyes open and look wise."

"Are there any questions you'd like to ask, Mr. Bingley?" said Sir Peter. Ernest made a barely visible, negative shake of his head.

"Mr. Bingley," said Sir Peter to the others, "always makes a career out of the study of anything before he commits himself. Am I not right, Mr. Bingley?"

Ernest nodded.

"To our muttons, then," said Sir Peter. "We'll hear first from the gentleman from Rotterdam. What do you say, Dr. Van Tromp?"

"One," said Dr. Van Tromp, just that, nothing more.

Sir Peter looked pained. He pointed at Mr. Silver.

"Two," said Mr. Silver.

"Three," said Mr. Mark Newsome, and blew a smoke-ring.

They all eyed Ernest expectantly. They saw a face as wooden and expressionless as a hickory two-by-four.

"Well, Mr. Bingley, will you say 'four'?" said Sir Peter in a satiric voice.

Ernest maintained a stolid silence.

"Come, come," coaxed Sir Peter, "do say 'four.' Will you?"

Ernest nodded. He did not see how any harm could come to him for being polite and playing this game, whatever it was. It might be a mental test, he reasoned, though the theory that it was an English version of the match game business men play to see who will pay for the lunch, occurred to Ernest.

It was Dr. Van Tromp's turn next, and after a moment of deep Dutch reflection he said:

"Four and a quarter."

"Four and a half," said Mr. Silver.

"Four and three quarters," said Sir Mark.

They waited for Ernest's move.

"It's up to you, Mr. Bingley," Sir Peter said. "I expect you to say 'five,' you know."

Ernest did not say it.

"Am I to understand that you say 'five'?" asked Sir Peter.

Ernest nodded.

"Five it is, then," said Sir Peter, and seemed pleased. "What do you say, Dr. Van Tromp?"

"Nudding," said Van Tromp.

"Can you better five, Silver?"

Mr. Silver said he could not.

"How about you, Sir Mark?"

"I'm most exceedingly sorry," said Sir Mark, "but five beats my best. Mr. Bingley has too much artillery on his side. I lower my boom to our friend from across the Atlantic."

"That," said Sir Peter, with a satisfied air, "just about winds up the old clock, I think. Unless, he added, 'one of you gentlemen wishes to lock horns with Mr. Bingley.'"

To Ernest's relief nobody seemed to want to lock horns with him.

Every 10c Packet of

WILSON'S FLY PADS

WILL KILL MORE FLIES THAN SEVERAL DOLLARS' WORTH OF ANY OTHER FLY-KILLER

10c WHY PAY MORE

Best of all fly killers. Clean, quick, sure, cheap. Ask your Druggist, Grocer or General Store.

THE WILSON FLY PAD CO., HAMILTON, ONT.

"You win, Mr. Bingley," Sir Peter said, and shook his hand. "You've made no mistake, believe me."

The others also shook Ernest's hand, and they did not seem much chagrined over their defeat. He tucked his cloak of silence tighter about him and waited for the prize.

"I must dash along now," Sir Peter said. "Sorry to seem so cavalier, but golf is golf, what? You don't really need me. Just drop into my office, Tyler House, Lombard street, and my junior partner, Mr. Armstrong, will take care of you. He knows the details and I'll phone him to be expecting you."

Ernest nodded, cheered by the thought that he was about to escape with his nine shillings and his pocket of pudding intact. He sensed now that this was no innocent game, but some complicated, mysterious commercial manoeuvre in which they had made him, for reasons known to them, a pawn.

The four important looking men were filing out of the room and Ernest was filing out with them, when their clothes were stopped by a man who burst into the room as if his shirt-tails were on fire.

It was Hubert Punder and to say Mr. Punder was hot is to say that molten lava is like chocolate ice cream. Mr. Punder generated heat in every direction.

"Hah!" he snorted. "Hah!"

"Why, Punder?" exclaimed Sir Peter. "What do you mean by breaking into a private meeting and going 'Hah!' at us?"

"Private meeting? Hah! Private swindle!" bellowed Punder.

"Watch your words, Punder," rapped out Sir Peter.

"I'd like to know what's happened here," Punder said.

"Ask Mr. Bingley."

"Hah!" said Punder, turning a venomous glare on Ernest. "Have you closed with these wolves?"

"He has," said Sir Peter, "and a little less of that wolf talk, if you don't mind."

"How much?" growled Punder.

Sir Mark answered for Ernest.

"Five," he said.

"Hah!" It was an outraged "Hah!"

"If 'Hah!' is all you have to say, we'll adjourn the meeting," said Sir Peter.

"No, you won't," said Punder. "I got plenty to say. I know your little game. I got spies, too. Trying to juggle me out P.P.P. hey?"

"I was not aware you wanted P.P.P.," averred Sir Peter.

"You thought nobody wanted it," said Punder. "You knew that without reorganization and a lot of fresh capital it was going on the rocks—so you and these three beauties

bailed your hooks—and went fishing. Well, you caught a fine founder, I must say."

It was entirely clear to Ernest that he was the founder.

(To Be Continued)

Things We Value

Are Those Which Have Cost Many Sacrifices To Attain

It seems to be a favorite form of advertising to urge that a certain article can be paid for without some pet luxury. How often we read that the price of two good cigars a day; that a bicycle can be paid for in the saving of car tickets.

The idea is to appeal to the economic impulse that every man has more or less in his make-up.

And what articles are prized more than those for which it is necessary to make some sacrifice? The husband and wife who have saved for a home little by little, and who have found it necessary to drop pleasures and extras that they had been accustomed to, will prize the place much more than if some rich aunt had died and willed them the property.

The young man who saves his first hundred dollars from his earnings will never forget the day when he saw three figures on the sunny side of his bank book.

When advertisers appeal to that instinct in human nature, they are on legitimate and safe ground. The things we value most highly in life are the ones that have cost something to attain.—Gleghu Mercury.

Write Long Letters

Laborers On Malay Estates Use Special Lightweight Paper

Native Indian laborers working on estates in Malay write such long letters home that a special lightweight paper has had to be manufactured for them.

Need for such paper was caused by the introduction of the Empire air mail system. The estate workers did not fully understand the weight restrictions and merely continued to write long letters home to India, where their relations had to pay additional postage. The relations objected.

Estate employers solved the problem for their workmen. They ordered from London large quantities of a specially made flimsy paper, which they distributed free among the laborers.

And since 11 sheets of this paper can be crammed into an envelope without going over the half-ounce-for-penny-halfpenny limit, the Indian workers in Malay can now get ahead with their writing. But even they are probably not as grateful as their wives and parents back in India.

During the many months of its run in the United States, a certain terrifying motion picture caused an average of 28 persons a week to faint or go into hysterical collapse.

Although the atmosphere is only about 10 miles above the earth, and less as we travel toward the poles, an aeroplane must travel a much longer route to reach it.

Scientists now estimate the age of the ocean at from 500,000,000 to 700,000,000 years.

GERMAN YOUTHS IDOLIZE BRITISH SOCCER STAR

When Cliff Eastin arrived in Berlin with the British soccer team he was

bombarded on all sides by enthusiastic young German autograph hunters.

In the picture he is autographing one of his own photographs which a German youth had in his possession.

The British Navy

520,000 Tons Of Warships Now Under Construction

Great Britain, strengthening her vast navy in its greatest peace-time expansion, has 520,000 tons of warships under construction at dockyards and private yards, including five battleships, 17 cruisers, 19 submarines, 32 destroyers and numerous smaller craft.

The admiralty has launched a three-point plan which, it believes, would keep principal trade routes to this country open in any emergency.

In a speech at Liverpool Geoffrey Shakespeare, parliamentary secretary to the admiralty, told an audience the plan called for:

Special naval convoys for main trade routes;

Conversion of old cruisers into anti-aircraft vessels;

Strengthening the navy's destroyer arm.

The admiralty, he said, believed that on the outbreak of any hostilities it could keep trade routes open and protect shipping bound for the United Kingdom with food and raw materials by a method of routing, convoy and escort.

The secretary attacked critics who claimed strength in the air was a more vital factor in safety than strength at sea. He said experience in recent wars had shown that air power by itself is not likely to win a war.

"Airplanes are fast but they are not self-contained, and it may take weeks and months for the necessary equipment, stores, ammunition and ground staffs to be taken to the bases overseas; whereas ships are self-contained and can go anywhere and stay anywhere," he said.

Earth Is To Blame

Astronomer Says Moon Has Jumped Its Beaten Track

The moon, astronomer Harold Spencer Jones said, has jumped its track. "And it's all the earth's fault," the astronomer told a meeting of the Royal Observatory of Greenwich.

The moon's course is plotted by the earth's time and the earth's time is reckoned by its rotation, Mr. Jones explained. Somewhere an unknown gigantic brake has suddenly been clamped on the spinning world, slowing it down, he said.

Dr. Martin Davidson, president of the British astronomical association, estimated this slowing down process was going on at the rate of about 1-100th second every century.

At present, he said, the moon is about six seconds off time off its beaten track.

Dependable Mail Carrier

Postal authorities of North Turner, Maine, know that the mail will go through when Mrs. Helen E. McAlister, mother of five children, sets out daily on a 14-mile round trip rural free delivery route. For five years she has delivered the mail in storm and flood without missing one day.

Bobby (short of money): "Say, Dad, have you any work you'd like me to do?"

Father (taken by surprise): "Why—no—but—"

Bobby: "Then how about putting me on relief."

It took Walter Hunt of New York just three hours to think up the safety pin, make a model of it and dispose of his patent rights for \$400. But he'd have made a fortune if he hadn't sold out.

A Babylonian king of the eighth century B.C. had a herb garden in which he grew about 70 kinds of plants.

Poland, we read, is joining in the search for a peace formula. How about the Golden Rule?

Fought Chinese Bandits

Missionary Found Athletic Training Stood Him in Good Stead

Stirring tale of battles with Chinese bandits were related by Rev. Father J. J. McDonald, who was in Toronto on his way to Windsor, N.S., on furlough after eight years as a missionary in Licht, Chekiang province. Father McDonald is the son of Windsor's chief of police and a graduate of St. Francis Xavier, where he played football and boxed.

Father McDonald's athletic experience came in handy at his mission post. He said that the father of a little girl at Licht told her to another old man for \$200 and she was to become the wife of the son of the purchaser, but when she grew up she didn't want to marry the man. Since she had become a Christian, Father McDonald advised her not to go through with the bargain that started the trouble.

Brigands turned up at the home of the girl's father, where the missionary was staying at the time, and Father McDonald had an idea they were after himself. "No doubt that's the reason I put up such a battle," he said.

The missionary led other men of the household in a hand-to-hand struggle with the invaders and after the fracas was over the bandits fled to the hills, carrying their wounded.

Germ Warfare

Says: Noxious Germs Will Not Be Used In Future Wars

Noxious germs will not be scattered from the skies in a future war, according to Wing-Commander R. J. Hodesol, inspector-general of air raid precautions. Bacteriological warfare is impossible, he told a meeting of sanitary inspectors in London. It was not feasible to drop "bugs" from the air.

"They do not take very kindly to being compressed and thrown about," said Commander Hodesol. "It would be necessary to introduce the 'bug' into the system, and shoot of a knife to make a hole when he arrived, it could not be done."

Overlooked The Soup

Famous Pianist's Chef Wanted All Of His Food Praised

Paderewski's chef always accompanied him on his concert tours, and like all good cooks he thrived on praise. Paderewski said that he got it, too. Once, after a special luncheon had been served to a party of the pianist's friends, Paderewski sent his compliments to the chef with a message that the fish was marvellous, the entree superb, and the dessert unsurpassable. Back came the messenger, saying:

"The chef says that the soup was good, too."

In the presence of moisture, cracks in concrete heal so lightly that the concrete may be stronger than before.

A motor for bicycles to be connected directly to the front sprocket has been patented.

JAM JELL—8 oz. Fluid Pectin for **25c**
jelly making

COFFEE—Fort York Delicious 2 lbs. **36c**
Coffee.

How Does Life Insurance Benefit The Farmer's Wife and Children?

Answer.—If the farmer has Life Insurance, the wife and children know that they will not be in want in case of his death.

Question.—How would insurance help?

Answer.—It would provide money for living expenses, to pay debts, meet mortgage payments, hire help, avoid sale of the farm at a sacrifice.

Q.—Couldn't this be done through ordinary savings?

A.—Usually a farmer leaves only a small amount of cash. Nor can he be sure to live long enough to save an adequate sum. Only through Life Insurance can he, with a minimum of saving each year, have the necessary money available in case of death.

Q.—How do the children benefit?

A.—The father who has Life Insurance is sure that the children will have the home, care and education that he intended.

Q.—How does Life Insurance benefit the farmer himself?

—If he lives to a retiring age, his insurance will provide a cash income to care for him.

Life Insurance

Guardian of Canadian Homes

IN THE SUPREME COURT OF ALBERTA (TRIAL DIVISION) JUDICIAL DISTRICT OF WETASKIWIN

Between:
CHARLES W. OLSON, Plaintiff
and
NELLIE MAY OLSON, Defendant.
